ABOUT
COVID

COVID

OUR MISSION IS TO ENSURE THE CONTINUITY OF LIFE FOR INDUSTRIAL AND COMMERCIAL VEHICLES SATISFYING THE DIFFERENT BODY PARTS DEMANDS AND ESTABLISHING AN ETHICAL AND SUSTAINABLE RELATIONSHIP WITH THE MARKET.

COVIND is an Italian industrial group specialized in the Design, Production and Marketing of automotive components for commercial and industrial vehicles.

Established in the early 1980s in the heart of Turin's industrial hub, today Covind

Company is a strong dynamic player, with an international reach, and a well-defined commercial organization spread throughout 70 countries across the world, composed by professionals of the Automotive sector in each country.

A B O U T

PRODUCTION & KNOW HOW

Covind continuously invests in technological innovation for the purposes of optimizing its production processes. Thanks to its thirty years of experience and to its highly qualified resources, Covind possesses a know-how that, combined with its diligent R&D activities, ensures reliable products of the highest quality. Covind

independently manages the entire lifecycle of its products in-house, employing a vertically integrated system for the design of the parts, mould construction, production, painting, and assembly. Its technical department follows every phase of the production process: from completing feasibility studies, reverse engineering, to the

launch of production activities. In order to stay competitive in terms of response times and quality, COVIND has equipped itself over the years with a technological layout that allows the production of components with processes, by injection compression, thermoforming, and rotational moulding. Covind manufactures plastic

and sheet metal products that supply a range consisting of 16 product groups, 126 product lines, and approximately 7,000 items including, for example, bumpers, hoods, footboards, mud flaps, doors, handles, rearview mirrors, etc.

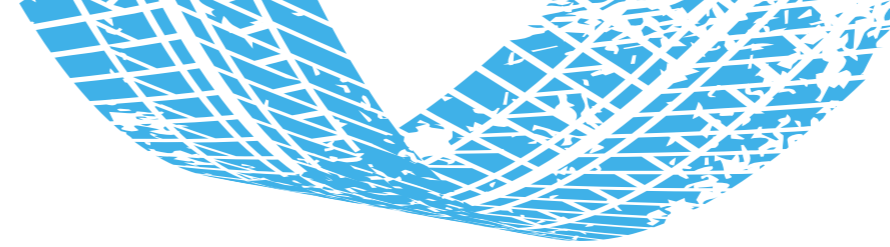

QUALITY

Since the beginning, we have pursued quality standards that guarantee indisputable products and services: **“Unlimited Quality”**.

Since the beginning, Covind has been synonymous with quality, pursuing the consolidation and development of its competitive position in the market through continuous improvements made to the quality, reliability, and safety of its products and services. To this end, Covind components are continuously subjected to rigorous, meticulous control processes to ensure products that comply perfectly with Manufacturers' standards and specifications.

Covind also boasts Gost-R certification, as well as additional recognitions issued by leading companies in inspection, control, testing, and certification services.

Know-how combined with innovation and experience: a recipe for success that defines our work.

The processes we use are highly technological and industrialized in every phase of product realization, from design and construction of the mold, to the molding process, from quality control to storage and shipping

Covind provides plastic and sheet metal components that are entirely equivalent to the original and produced with avant-gard machinery.

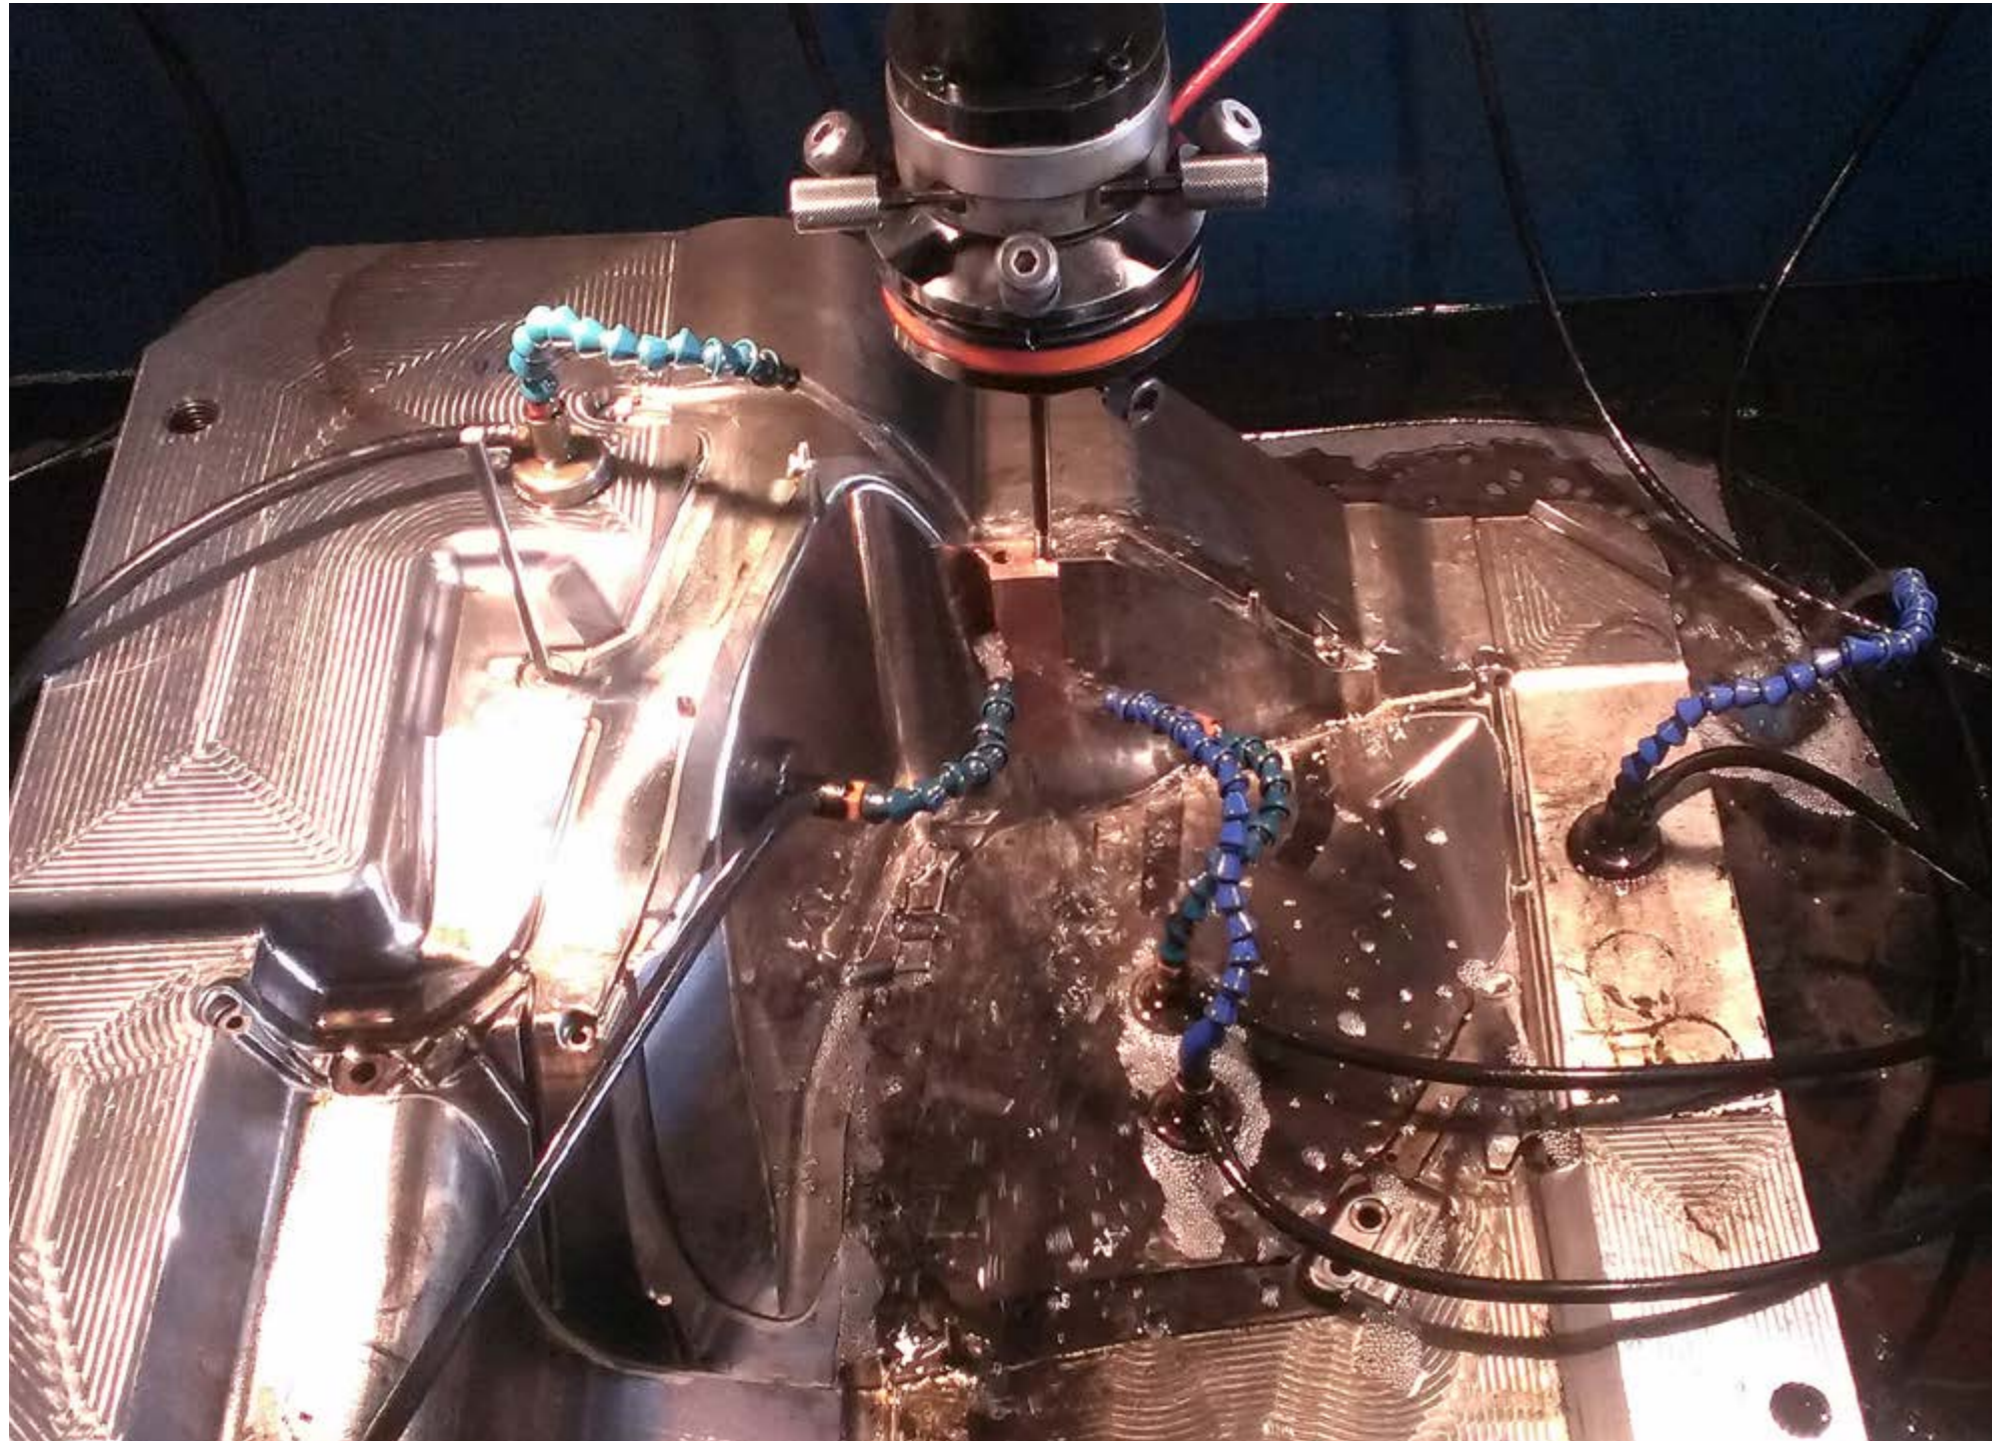

With the New Millennium, the materials used in the production of bodyparts have changed, going from metals to plastics.

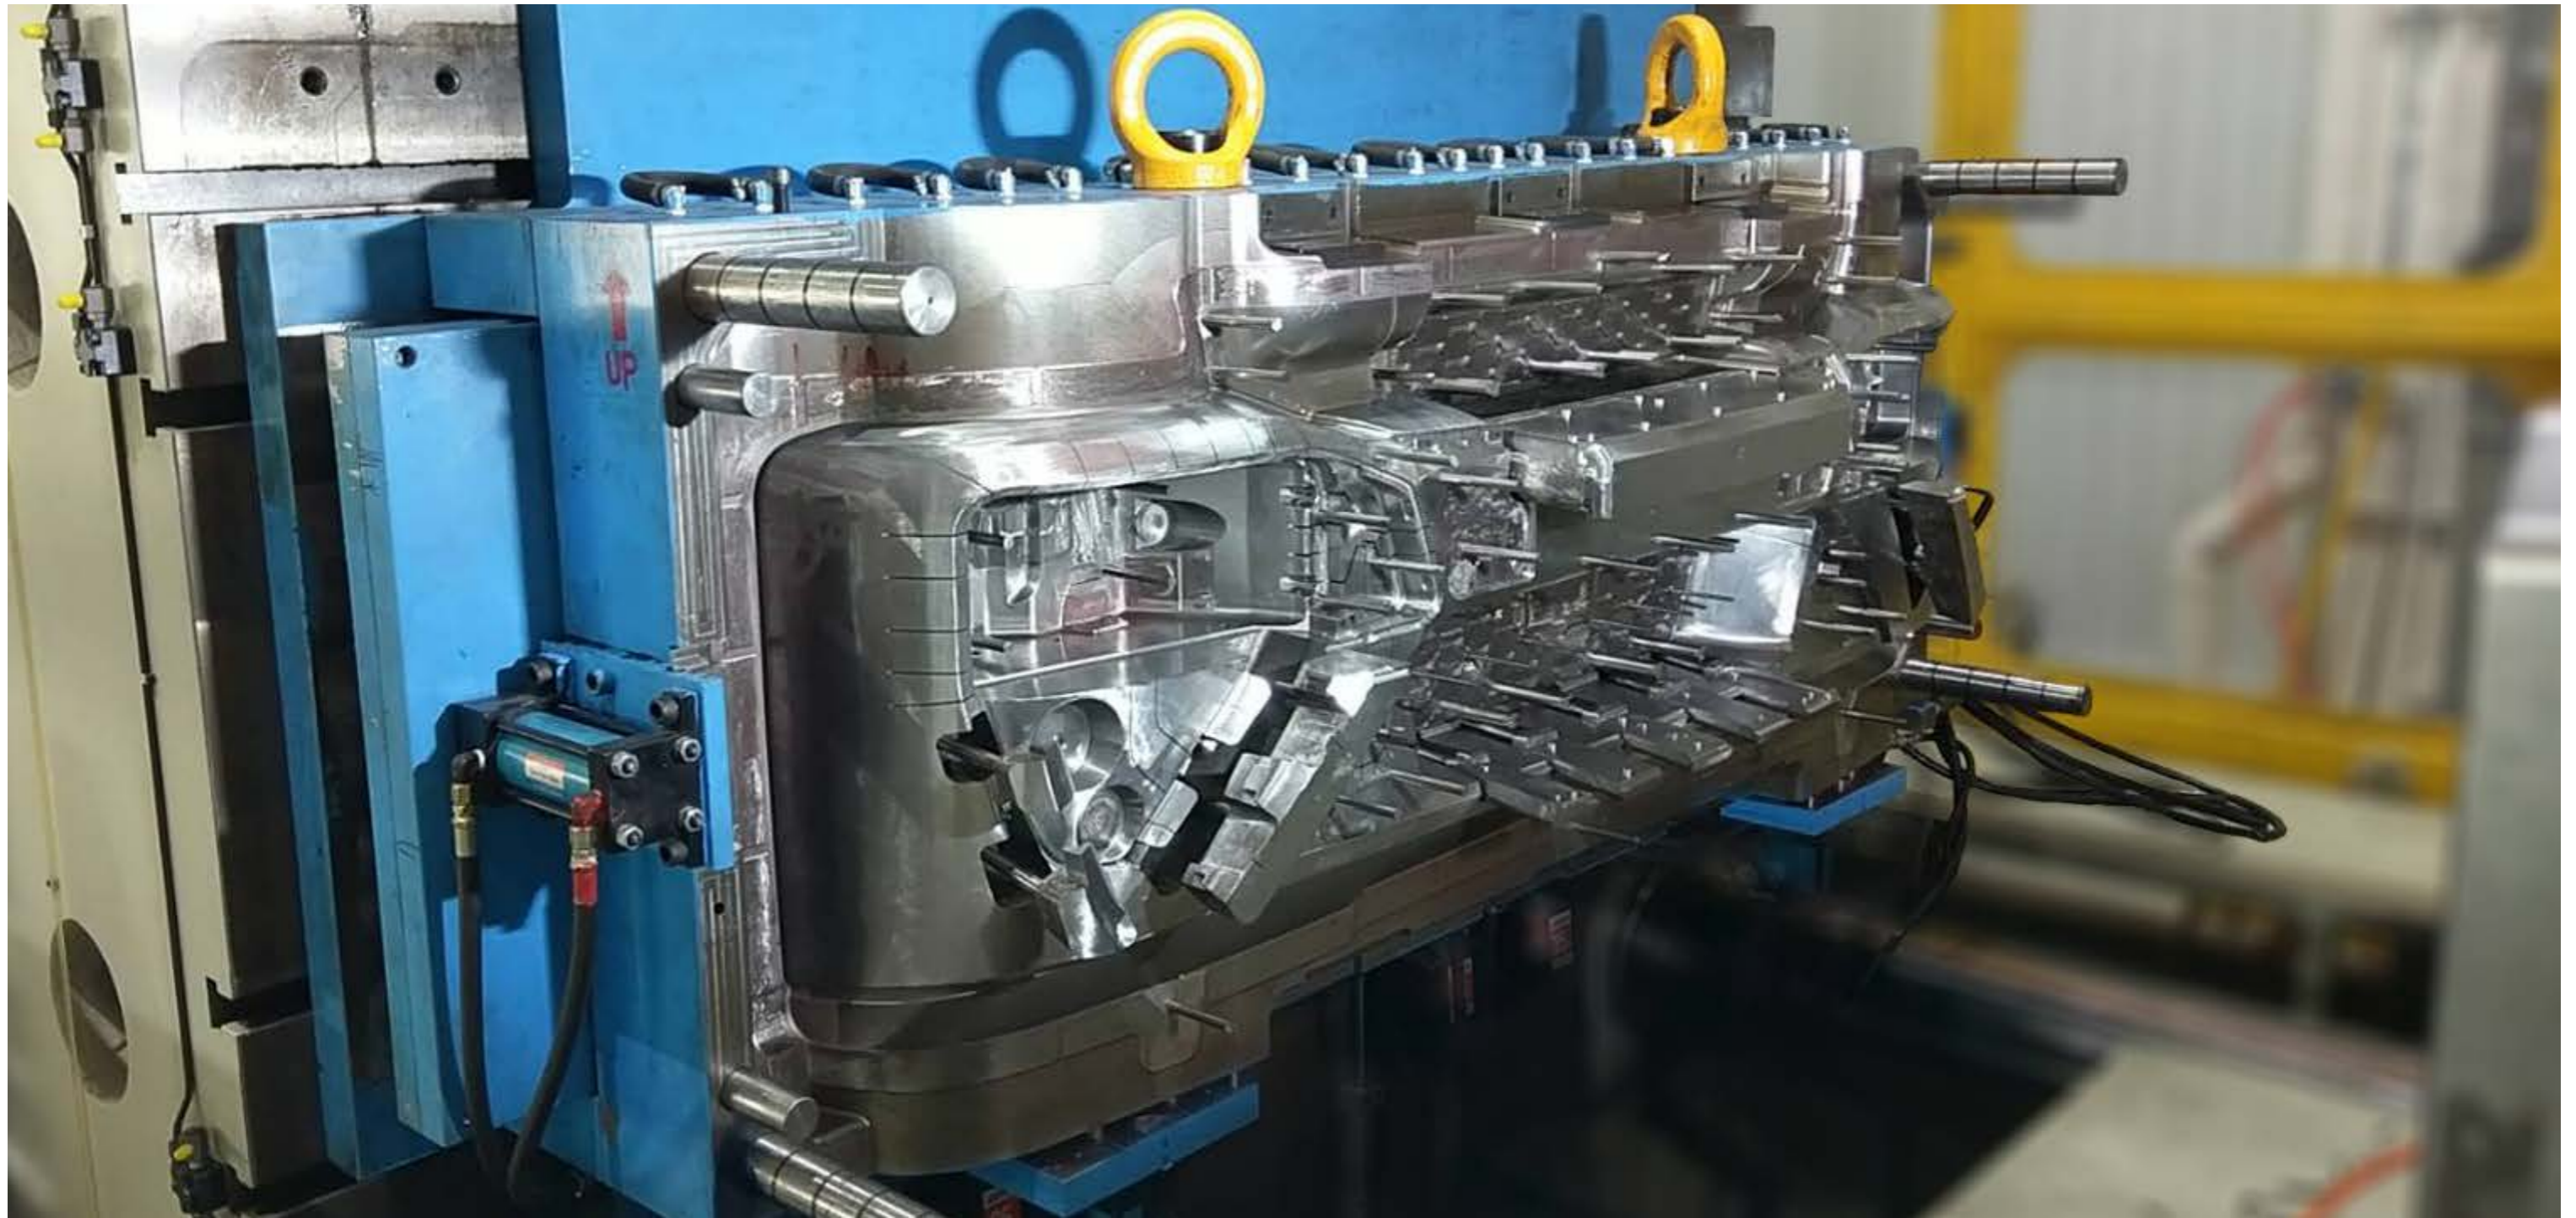

Covind, too, introduced into its production many components in mixed plastics, by adopting advanced production processes and ensuring the complete equivalence of products with the original.

We didn't forget, however, the production of sheet metal components, which continue to be present particularly outside Europe.

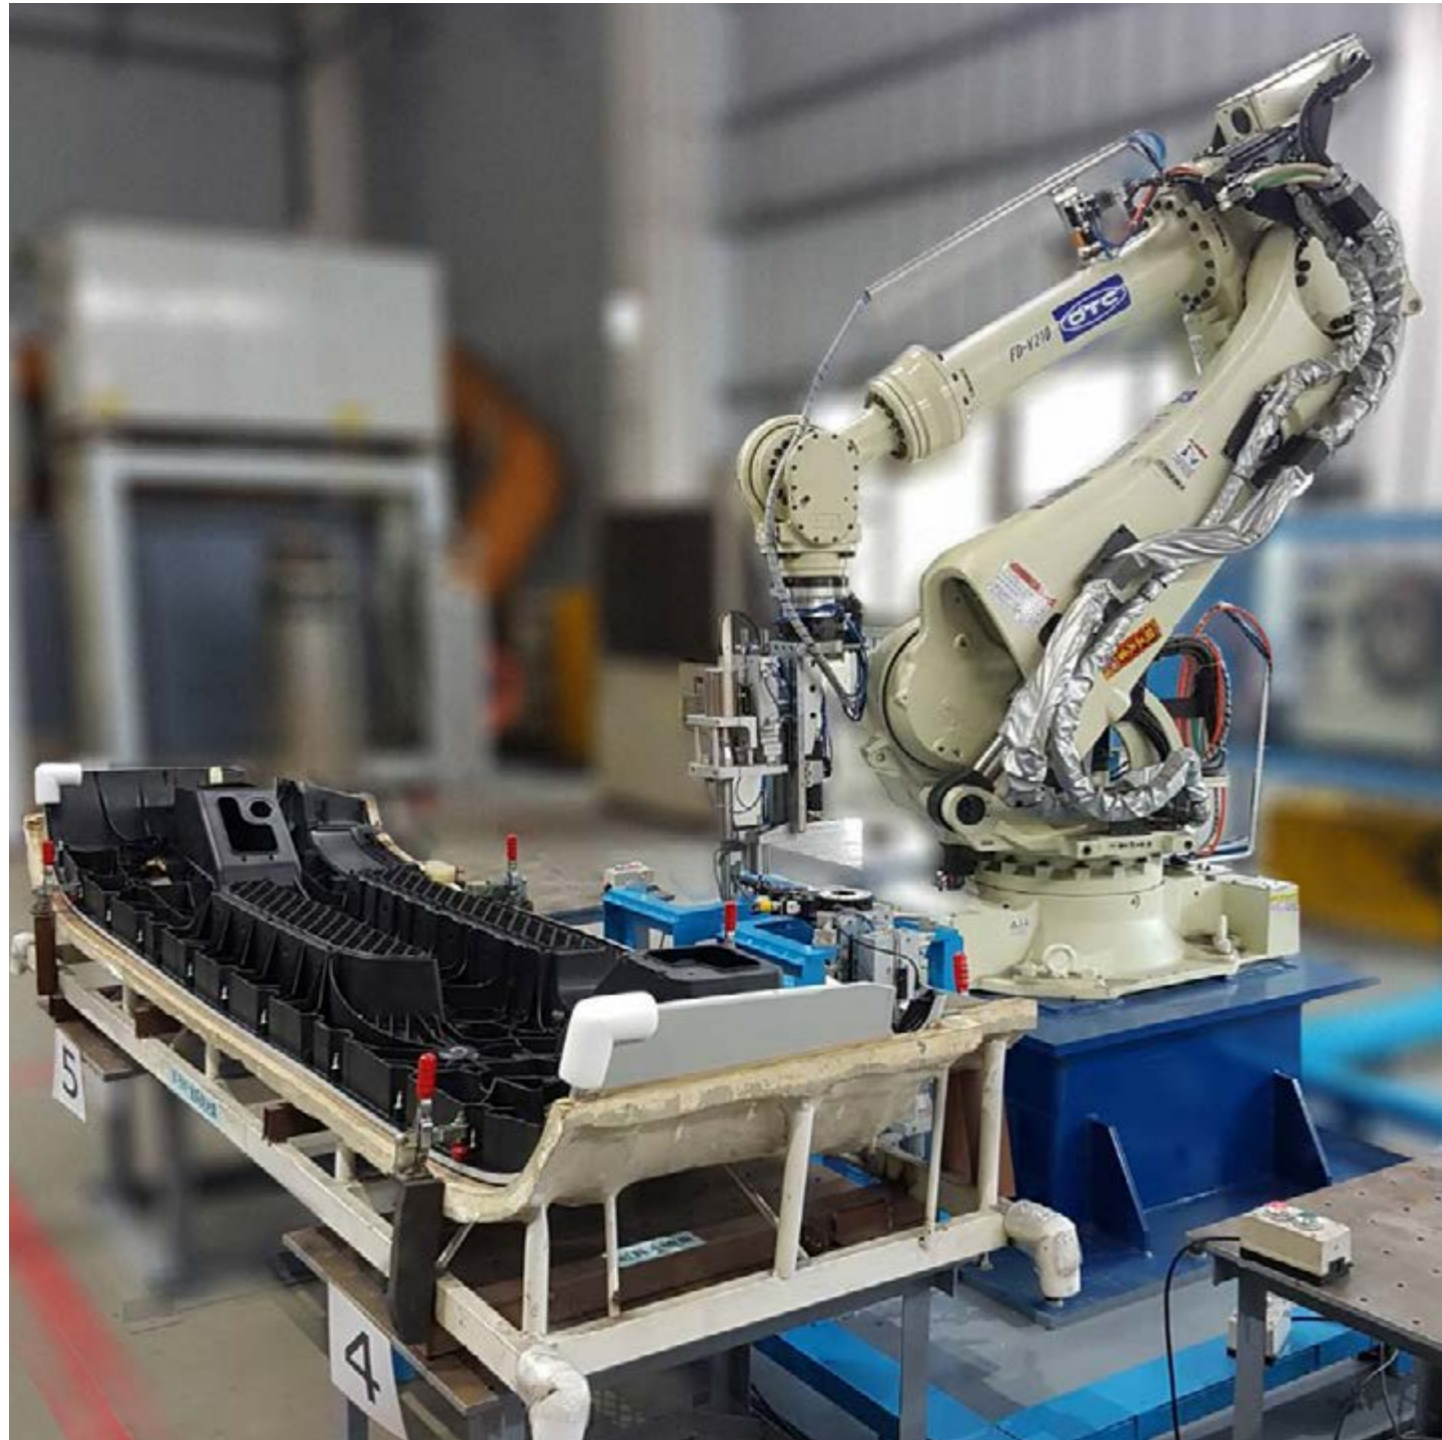

MOULDS

THANKS TO ITS THIRTY YEARS' EXPERIENCE AND HIGHLY QUALIFIED TECHNICIANS, COVIND HAS AN INTERNAL KNOW-HOW AND A WEALTH OF KNOWLEDGE DERIVED FROM EXPERIENCE AND "ON FIELD" TESTING THAT GUARANTEE A HIGHLY PERFORMING FINISHED PRODUCT, OF EQUAL QUALITY TO THE ORIGINAL.

SINCE THE BEGINNING, WE
HAVE PURSUED QUALITY
STANDARDS THAT
GUARANTEE INDISPUTABLE
PRODUCTS AND SERVICES:
"UNLIMITED QUALITY".

LOGISTICS

EFFICIENT LOGISTIC SERVICES SUPPORTED BY AN ADVANCED INFORMATION SYSTEM, WITH AN EYE TOWARD OPTIMAL RESPONSE TIMES.

Another key element and distinctive mark of Covind is the efficiency of its logistics system, which has been refined over time and evolved in an international mindset. It is capable of planning and synchronizing a multiplicity of flows of goods and managing all related information, allowing the company to overcome the structural constraints and shortcomings inherent in the various Country systems.

Covind can rely on a warehouse surface area of over 50,000 square metres, allowing for immediate product availability and, therefore, greater speed of delivery of the same.

Particular attention is dedicated to the packaging phases, seeking out flexible solutions designed to minimize the space while maximizing protection of the content.

All of our items are uniquely identified, so as to ensure their optimal management and fast, secure traceability throughout the logistics flow.

Covind can rely on a warehouse surface area of over 50.000 square metres, allowing for immediate product availability and, therefore, greater speed of delivery of the same.
